Fertilizer Research **28**: 349–350, 1991

Index to Volume 28

Morel, C. and Fardeau, J.C.: Phosphorus bioavailability of fertilizers: a predictive laboratory method for its evaluation 1
Bolland, M.D.A. and Gilkes, R.J.: Evaluation of two rock phosphates and a calcined rock phosphate as maintenance fertilizers for crop – pasture rotations in Western Australia 11
Manna, A.B. and Singh, P.K.: Effects of nitrogen fertilizer application methods on growth and acetylene reduction activity of *Azolla pinnata* and yield of rice 25
Chandra Sekhara Rao, A. and Subba Rao, I.V.: Investigations on crop responses to applied phosphorus in semi-arid vertisols of India 31
Bumb, B.L.: Trends in fertilizer use and production in sub-Saharan Africa, 1970–95: an overview 41
Shaviv, A. and Hagin, J.: Interaction of root distribution of corn with fertilizer placement and frequency of irrigation in lysimeters 49
Satrusajang, A., Snitwongse, P., Buresh, R.J. and Friesen, D.K.: Nitrogen-15 and sulfur-35 balances for fertilizers applied to transplanted rainfed lowland rice 55
Memon, K.S., Puno, H.K. and Fox, R.L.: Phosphate sorption approach for determining phosphorus requirements of wheat in calcareous soils 67
Benbi, D.K., Prihar, S.S. and Cheema, H.S.: A model to predict changes in soil moisture, NO_3-N content and N uptake by wheat 73
Rajan, S.S.S., Fox, R.L., Saunders, W.M.H. and Upsdell, M.: Influence of pH, time and rate of application on phosphate rock dissolution and availability to pastures. *I. Agronomic benefits* 85
Rajan, S.S.S., Fox, R.L. and Saunders, W.M.H.: Influence of pH, time and rate of application on phosphate rock dissolution and availability to pastures *II. Soil chemical studies* 95
Darst, B.C.: Development of the potash fertilizer industry 103
Jørgensen, T.: A particle analyser for measuring particle size distribution and shape, on-line or in the laboratory 109
Rylant, W.K., Moore, O.E. and Lee, R.G.: Suspension quality and grade from commercial MAP 115
Gullett, L.L., Simmons, C.L. and Lee, R.G.: Sulfur coating of urea treated with attapulgite clay 123
Smith, C.J., Freney, J.R., Sherlock, R.R. and Galbally, I.E.: The fate of urea nitrogen applied in a foliar spray to wheat at heading 129
Francis, G.S. and Haynes, R.J.: The leaching and chemical transformations of surface-applied urea under flood irrigation 139
Bolland, M.D.A.: Tissue testing for phosphorus in dried tops and seeds: effect of fertilizer type, plant species, and time of sampling within a year and in different years 147
Watson, C.J. and Kilpatrick, D.J.: The effect of urea pellet size and rate of application on ammonia volatilization and soil nitrogen dynamics 163
Benbi, D.K., Biswas, C.R. and Kalkat, J.S.: Nitrate distribution and accumulation in an Ustochrept soil profile in a long term fertilizer experiment 173
Bijay-Singh, Yadvinder-Singh, Khind, C.S. and Meelu, O.P.: Leaching losses of urea-N applied to permeable soils under lowland rice 179
Lewis, D.C., Potter, T.D. and Weckert, S.E.: The effect of nitrogen, phosphorus and potassium fertilizer applications on the seed yield of sunflower (*Helianthus annuus* L.) grown on sandy soils and the prediction of phosphorus and potassium responses by soil tests 185
Narayan, P. and Gupta, U.: Fertilizer subsidy: food security nexus 191
Al-Fariss, T.F., Ozbelge, H.O., Elnashaie, S.S.E.H., AbdulRazik, S.M., Abdel Aleem, F.A. and Gassem, N.: Preliminary investigation for the production of wet-process phosphoric acid from Saudi phosphate ores 201
Bhatti, M.E.: Quality control measures for developing of 10:20:20 grade fertilizer 213
Johnson, F.J.: The role of the state chemist in the development of the US fertilizer industry 217
Norwood, III, V.M. and Kohler, J.J.: Characterization of fluorine-, aluminum-, silicon-, and phosphorus-containing complexes in wet-process phosphoric acid using nuclear magnetic resonance spectroscopy 221

Clapp Jr., J.G. and Parham Jr., T.M.: Properties and uses of liquid urea-triazone-based nitrogen fertilizers 229
Dahanayake, K. and Subasinghe, S.M.N.D.: Mineralogical, chemical and solubility variations in the Eppawala phosphate deposit of Sri Lanka - a case for selective mining for fertilizers 233
Falls, J.H.: Comparison and review of three available P_2O_5 methods for diammonium phosphate and triple superphosphate 239
Mengel, K.: Available nitrogen in soils and its determination by the 'Nmin-method' and by electroultrafiltration (EUF) 251
Malhi, S.S. and Nyborg, M.: Recovery of ^{15}N-labelled urea: influence of zero tillage, and time and method of application 263
Bationo, A., Baethgen, W.E., Christianson, C.B. and Mokwunye, A.U.: Comparison of five soil testing methods to establish phosphorus sufficiency levels in soil fertilized with water-soluble and sparingly soluble-P sources 271
Golden, D.C., White, R.E., Tillman, R.W. and Stewart, R.B.: Partially acidulated reactive phosphate rock (PAPR) fertilizer and its reactions in soil *I. Initial movement of dissolved ions and solubility of the phosphate rock residue* 281
Golden, D.C., Stewart, R.B., Tillman, R.W. and White R.E.: Partially acidulated reactive phosphate rock (PAPR) fertilizer and its reactions in soil *II. Mineralogy and morphology of the reaction products* 295
Holford, I.C.R. and Crocker, G.J.: Residual effects of phosphate fertilizers in relation to phosphate sorptivities of 27 soils 305
Venkitaswamy, R., Subramanian, S. and Veerabadran, V.: Influence of modified forms of urea and nitrogen levels on weed growth and grain yield of lowland rice 315
Savant, N.K., Ongkingco, P.S., Zarate, I.V., Torrizo, F.M. and Stangel, P.J.: Urea briquette applicator for transplanted rice 323
Govi, M., Ciavatta, C., Vittori Antisari, L. and Sequi, P.: Characterization of humified substances in organic fertilizers by means of analytical electrofocusing (EF): a first approach 333
Riera, F.A., Alvarez, R. and Coca, J.: Humic fertilizers by oxiammoniation of hydrolyzed olive pits residues 341
